# IS YOUR WEB PLATFORM READY FOR AI?

**If AI can't understand your site, your customers won't find you.**

LLMs and AI search engines prioritize sites they can easily understand and contextualize. Most sites weren’t built with AI discovery in mind. Yours should be.

# Turn your site into an authoritative source AI can't ignore

AI discovery isn't about tricks, it's about making your content clear, well-organized, and contextually rich. When your competitors' sites are easier for AI to parse and cite, they win the visibility your site should have earned.

Our site uses structured data generation, AI-powered tagging, related content, and AI search.

**See it in action on Tag1.com!**

**What an AI Readiness Audit covers:**

- Make your high-value pages easier for AI to understand and cite, so you earn more visibility when visitors search with AI.
- Turn your existing content into smarter journeys with AI-powered tagging and related content that keep users engaged longer.
- Identify where AI-driven search and discovery solutions could help visitors find answers faster.

**Tailored AI. Enterprise Results.**
